

The Island Project

Task:

This will be the design/outline of your island. Draw a draft of your island and its inclusions. Make sure your island does not get too over crowded. Ensure you include all of the necessary elements from your planning sheet.

Consider:

Food and Water Source placement- what crops will be grown, what natural water sources are there?

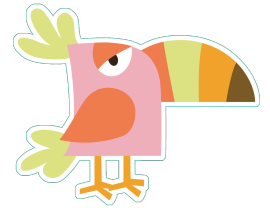

Shape of Island- representing symbol

Shelter- where will the main source of shelter housing be?

Roads - these should be leading to the main attractions, landmarks and departure/arrival points on the island.

Geographical Features- water sources, mountains, volcanos, desert, beach etc.

Landmarks- Statues, Attractions to see like the 12 Apostles, Uluru, Stone Henge etc

A large, empty rectangular box with a thick black border, intended for drawing a draft of an island and its inclusions.
